**Re: City of Okeechobee Police Officers' Retirement System
GASB Statement No. 67 Year End (*True-Up*)**

Dear Scott:

As requested, we are pleased to enclose a copy of the Year-End Disclosure Report of actuarial information as of September 30, 2022 for the City of Okeechobee Police Officers' Retirement System (System) required under GASB Statement Number 67.

Enclosed are the following exhibits:

- Statement of Change in Net Pension Liability and Ratios
- Schedule of Contributions
- Notes to Schedule of Contributions
- Discount Rate
- Sensitivity Analysis

The actuarial valuation of the liabilities is determined as of the beginning of the year, October 1, 2021, and *rolled forward* to the measurement date, September 30, 2022. As you are aware, using the beginning year valuation liabilities allows for timelier reporting at year end. If significant changes occur during the year, such as benefit changes or changes in assumptions or methods, these may need to be reflected in the process.

The enclosed exhibits are based upon draft financial information as of September 30, 2022, which was furnished by the System. If any of this information changes during the auditing process, then these exhibits may need to be revised.

Please note there are other items not listed above that will be required in the System's financial statements and / or the City's Comprehensive Annual Financial Report to fully comply with GASB Statement Number 67 standards. This additional information will need to be provided by the System's investment consultants, accountants or other financial statement preparers.

Required Disclosures

System provisions, member census data and actuarial assumptions and methods employed for purposes of our calculations are the same System provisions, member census data and actuarial assumptions and methods utilized for the October 1, 2021 Actuarial Valuation.

The actuarial assumptions used in the Actuarial Valuation are as adopted by the Board of Trustees. The mortality assumptions are prescribed by statute. Each assumption represents an estimate of future System experience.

Draft financial data was provided by the System for the October 1, 2022 Actuarial Valuation. Total DROP account balances as of September 30, 2022 are reported as \$297,784. Total Share Plan account balances as of September 30, 2022 are reported as \$52,741.

The GASB Net Pension Liability and System Fiduciary Net Position as a Percentage of Total Pension Liability may not be appropriate for assessing the sufficiency of System assets to meet the estimated cost of settling benefit obligations but may be appropriate for assessing the need for or the amount of future contributions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: System experience differing from anticipated under the economic or demographic assumptions; changes in economic or anticipated under the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and changes in System provisions or applicable law. Due to the limited scope of the actuary's assignment, the actuary did not perform an analysis of the potential range of such future measurements.

This report should not be relied on for any purpose other than the purpose described in the primary communication. Determinations of the financial results associated with the benefits described in this report in a manner other than the intended purpose may produce significantly different results.

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement plans. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the System as of the valuation date. All calculations have been

Mr. Scott Baur

made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board and with applicable statutes.

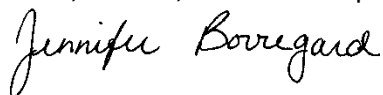

This report was prepared at the request of the Board and is intended for use by the Board and those designated or approved by the Board. This report may be provided to parties other than the Board only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The signing actuaries are independent of the System sponsor.

The undersigned are Members of the American Academy of Actuaries and meet the qualification standards of the American Academy of Actuaries to render the actuarial opinions contained in this report.

If you should have any questions concerning the above or if we may be of further assistance with this matter, please do not hesitate to contact us.

Sincerest regards,
Gabriel, Roeder, Smith & Company

Jennifer M. Borregard, E.A.
Consultant and Actuary

Update procedures used to roll forward TPL excluding DROP and Share account balances, if any, to the measurement dates - actual DROP and Share account balances, if any, as of measurement dates included in TPL.									

See Notes to Schedule of Contributions for benefit and assumption changes during the years.

* Reported payroll used to determine contribution as provided under GASB Statement Number 82.

GASB Statement Number 67 Information

II. Schedule of Employer Contributions

<u>Fiscal Year End 9/30</u>	<u>Actuarially Determined Contribution</u>	<u>Actual Contribution¹</u>	<u>Contribution Deficiency (Excess)</u>	<u>Covered Payroll²</u>	<u>Actual Contribution as a % of Covered Payroll</u>
2013	\$ 238,354	\$ 239,328	\$ (974)	\$ 928,285	25.78%
2014	267,849	267,849	0	862,700	31.05%
2015	263,240	263,388	(148)	954,800	27.59%
2016	219,093	221,272	(2,179)	911,080	24.29%
2017	251,591	248,448	3,143	917,260	27.09%
2018	212,571	233,182	(20,611)	924,250	25.23%
2019	204,611	221,039	(16,428)	1,007,180	21.95%
2020	192,448	217,461	(25,013)	1,061,193	20.49%
2021	185,025	187,174	(2,149)	1,125,784	16.63%
2022	158,267	160,339	(2,072)	1,097,275	14.61%

¹ Includes State contributions in excess of the amount allowable to be used as an offset to the City's contribution requirement.

² Reported payroll used to determine contribution as provided under GASB Statement Number 82.

GASB Statement Number 67 Information

III. Notes to Schedule of Contributions

Valuation Date: Actuarially determined contributions are calculated as of October 1st - two years prior the fiscal year end in which contributions are paid.

Methods and Assumptions Used to Determine Contribution Rates for Fiscal Year Ended September 30, 2022:

Actuarial Cost Method	Aggregate
Amortization Method	N/A
Amortization Period	N/A
Asset Valuation Method	4-year smoothed market value
Inflation	2.5%
Salary Increases	6.0%
Investment Rate of Return	7.0%
Retirement Age	100% when first eligible for Normal Retirement or DROP entry.
Mortality	For healthy participants during employment, PUB-2010 Headcount Weighted Safety Employee Female Mortality Table and Safety Below Median Employee Male Mortality Table, both set forward 1 year, with fully generational mortality improvements projected to each future decrement date with Scale MP-2018.

For healthy participants post employment, PUB-2010 Headcount Weighted Safety Healthy Retiree Female Mortality Table and Safety Below Median Healthy Retiree Male Mortality Table, both set forward 1 year, with fully generational mortality improvements projected to each future decrement date with Scale MP-2018.

For disabled participants, 80% PUB-2010 Headcount Weighted General Disabled Retiree Mortality Table / 20% PUB-2010 Headcount Weighted Safety Disabled Retiree Mortality Table, separate rates for males and females, without projected mortality improvements.

Cost of Living Adjustment	0.5% every odd year
---------------------------	---------------------

Other Information:

Benefit Changes	None
Assumption Changes	2019 - Mortality assumptions updated; 2016 - Mortality assumptions updated; 2014 - Mortality assumptions updated.

GASB Statement Number 67 Information

IV. Discount Rate

A discount rate of 7.0% was used to measure the TPL. This discount rate was based on the expected rate of return on System investments of 7.0%. The projection of cash flows used to determine this discount rate assumed member contributions will be made at the current member contribution rate and employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member contribution rate. Based on these assumptions, the System's fiduciary net position was projected to be available to make all projected future expected benefit payments of current System members. Therefore, the long-term expected rate of return on System investments was applied to all periods of projected benefit payments to determine the TPL.

V. Sensitivity of the NPL to the Discount Rate Assumption

Measurement date: September 30, 2022

	<u>1% Decrease</u>	<u>Current Discount Rate</u>	<u>1% Increase</u>
Discount Rate	6.00%	7.00%	8.00%
NPL	\$1,512,796	\$342,900	(\$632,799)
