^{*}Adjusted by excluding plans from average whose Funded Ratios were not within two standard deviations from the mean

^{**}Excludes plans with zero payroll

Actuarial Summary Fact Sheet – Glossary of Terms

Actuarial Value of Plan Assets (AVA): Assets calculated under an asset valuation method smoothing the effects of

volatility in market value of assets. Used to determine employer contribution.

Actuarial Accrued Liability (AAL): Portion of Present Value of Fully Projected Benefits attributable to service

credit earned as of the current actuarial valuation date.

Unfunded Accrued Liability (UAL): The difference between the actuarial accrued liability and the actuarial value

of assets accumulated to finance the obligation.

Market Value of Plan Assets (MVA): The fair market value of assets, including DROP accounts.

MVA Funded Ratio: Market Value of Plan Assets divided by Actuarial Accrued Liability (GASB)

Rate of Return (Assumed): Assumed long-term rate of return on the pension fund assets.

Funding requirement as percentage of payroll:

Total Required Contribution (employer and employee) divided by total

payroll of active participants

AFC: Average Final Compensation or some variant of compensation

(e.g., AME [Average Monthly Earnings], FAC [Final Average Compensation], FMC [Final Monthly Compensation] etc.)

SC: Service Credit

Section 112.664 - Glossary of Terms

Florida Statute Chapter: 112.664(1)(a) – uses mortality tables used in either of the two most recently

published FRS valuation reports, with projection scale for mortality

improvement

112.664(1)(b) – uses same mortality assumption as 112.664(1)(a) but using

an assumed discount rate equal to 200 basis points (2.00%) less than

plan's assumed rate of return.

Valuation Basis – uses all the assumptions in the plan's valuation as of the

current actuarial valuation date.

Discount Rate: Rate used to discount the liabilities. Typically the same as assumed rate of

return on assets.

Total Pension Liability: Actuarial Accrued Liability measured using the appropriate assumptions as

specified above and the Traditional Individual Entry Age Normal Cost

Net Pension Liability: Total Pension Liability minus Market Value of Plan Assets.

Years assets sustain benefit

payments:

Assuming no future contributions from any source, the number of years the

market value of assets will sustain payment of expected retirement benefits. The number of years will vary based on the Florida Statute

Chapter assumption.

Total Dollar Contribution: Required contribution from all sources (i.e., employee and sponsor).

Contribution will vary based on the Florida Statute Chapter assumption.

Total % of Pay Contribution: Total Dollar Contribution divided by total payroll of active participants

Annual financial statements: A report issued which covers a local government retirement system or plan

to satisfy the financial reporting requirements of section 112.664(1), F.S.
